

# How to use and clean SCE refillable K-cups

## Three Easy Steps

1. Place small paper filter in Solofill cup and fill with ground coffee.
2. Close the lid and brew your coffee.
3. When done, compost the grounds and rinse the cup for the next user.

### Filling Tips and Tricks

- Fill coffee **ONLY** to the indicated maximum fill level.
- Do not under fill coffee below the filter screen line. This can result in a weak & watered down cup of coffee.
- Do not tamp or pack the coffee as this may clog the filter screen. Instead, **LIGHTLY** tap the Solofill cup on the table to settle and level the coffee grinds.

### Easy Cleaning/Composting

- With the lid still closed, turn the Solofill Cup upside down and firmly tap the lid on a counter top.
- Open the lid over the compost bucket and the entire paper filter and the coffee puck should fall out with a slight shake.
- Brush any remaining coffee grounds into the compost bucket.
- Please rinse the Solofill cup after each use.
